LETTER FROM THE CEO

"Spreading beauty everywhere in the world" this has been the flame that fueled our work since 1985. A burning passion that we have inside and that accompanies us even today, after almost 36 years.

Such beauty starts from the love of every single person in Extravega for what we do, from our smallest gesture, up to the culture of the greater good.

From attention to the quality of the details in our architectural and interior works, to the satisfaction we feel during the installation phase, to the perfect delivery of what we have created in the hands of the customer.

In 2020 we have continued to aim for beauty. A challenging and special year for our company and our industry. The pandemic came unexpectedly for everyone and it made us think and stimulated us to insist on continuous improvement. Right from the start it was clear that there would be a significant impact on our work and it was necessary to imagine a change that would lead to a positive transformation for all the people we reach every day, both employees and clients.

That's why everyone studied so much, all year long, so that by the end of 2020 we could say we had perfected ourselves in several areas. And this growth, this inner enrichment made us move to a new and higher level of awareness. From this new perspective, was an inevitable step to change our legal form to a Benefit Society, where there is a need to measure the levels of impact we have on the world around us, and subsequently to be held accountable for such impact, was an inevitable step.

Becoming a Benefit Society helps us to create more value and to be even more conscientious towards the community, the territory, and all the stakeholders on which we have a responsibility.

We want to continue our commitment to undertake an integrated path of

development and ongoing innovation with criteria of environmental and social sustainability consistent with the new corporate purpose of the Statute.

To be able to measure our impact, to give ourselves new business objectives and to be able to communicate them to our public (Extravega's collaborators first and foremost), are all duties which have the greater good as a common objective. By going in this direction we can increase the quality of our work and continue to search for beauty - which will bring more peace to a larger number of people, both socially and environmentally - in every aspect of our lives.

At Extravega we never stop learning and setting new goals: to become a B Corp we have raised the level that measures our performance, with the aim of evolving and helping those around us.

We are deeply grateful for what we have achieved so far and for all the actions that will lead us to contribute to the formation of a virtuous society of people who know how to respect and appreciate each other.

PROFILE AND GOVERNANCE

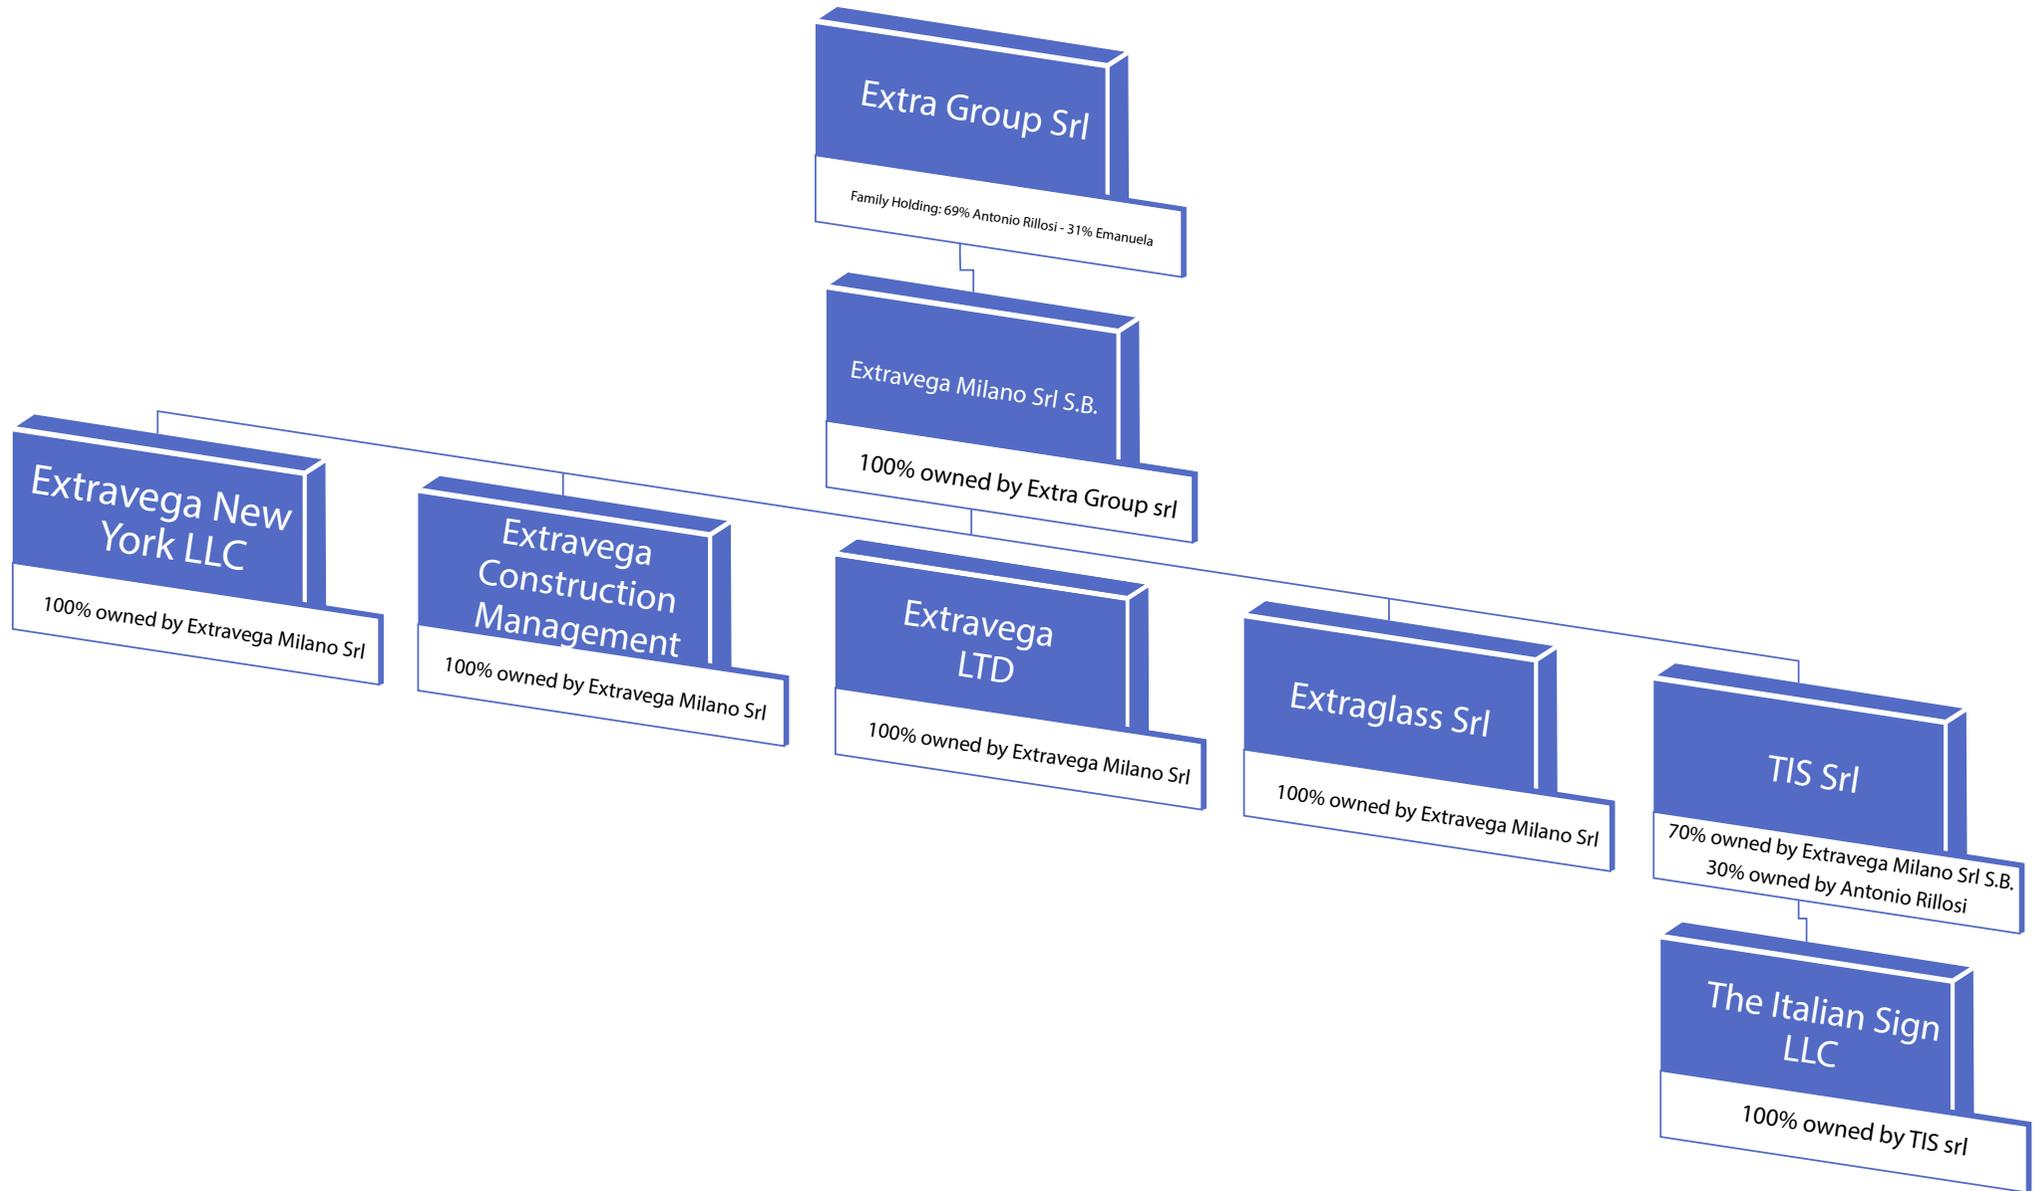

1. WHO WE ARE

Extravega is a company specialized in the design, production and installation of exclusive bespoke design works and environments. Founded in 1985, after more than thirty six years of activity and dynamic presence, Extravega today, is a group that operates worldwide in the fields of Architecture and Design, through its offices in New York, London, Dubai, Milan and Sydney and other subsidiary entities such as Extravega Construction Management and TIS (The Italian Sign).

The eclectic nature of Extravega has led to the development of numerous productions in collaboration with world-renowned architects and designers, creating custom projects with different levels of technical and production complexity: construction of architectural works, exhibition space set-ups, furniture, works of art and design.

1. VISION & MISSION

We want to realize the most complex, important and architecturally impressive projects of architects/designers from all over the world. Using, in every aspect of our work, technology and innovation, we want to realize projects that no one has ever done before.

We produce architectural and interior design products in metal, glass, wood, liquid metal and composite materials, both by customer's design and by our own, for those customers who have special and unique projects to be realized in a workmanlike manner. We use the latest technologies in the field of machinery, design and management software to deliver projects with the highest quality. We allow our clients to reach new levels of complexity, to venture into challenging jobs, to dream big, allowing them to gain tremendous satisfaction in seeing projects completed and installed. Our focus is on innovation and global expansion every day.

1. VALUES

We seek unceasing improvement of our company and perfection in what we do, putting care and passion into what we deliver. We dream of a world that smiles and respects agreements, knowing that it depends first of all on ourselves.

We want to contribute to the creation of a virtuous society of people who know how to appreciate each other.

School for us never ends: the talents we have been given are a gift from God. What we do every day to improve ourselves is the only way we can thank Him for everything He has entrusted to us.

We guarantee, to all those who actively collaborate in the achievement of these goals, thanks also to the continuous training of the entire Extravega team, a continuous improvement in economic well-being as well as an increase in human and professional knowledge.

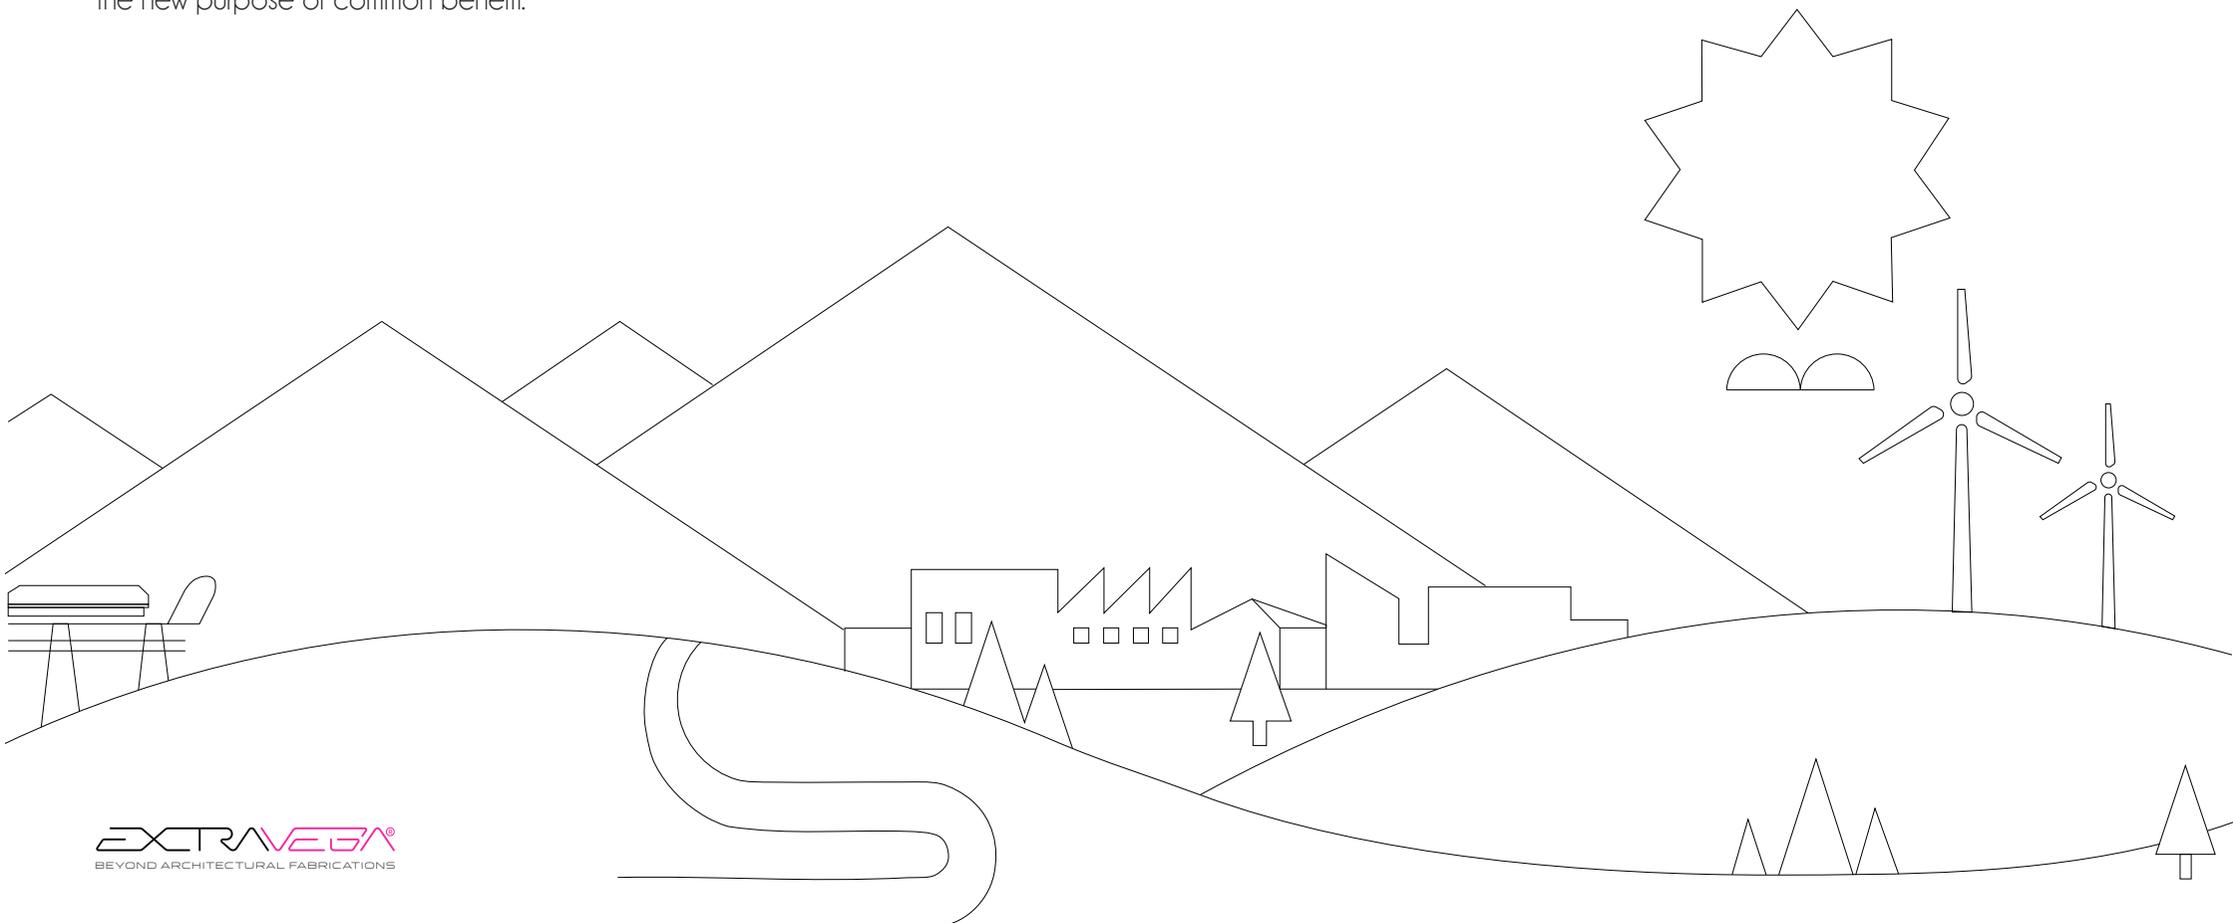

1. THE CHOICE TO BE A BENEFIT COMPANY

Extravega believes that the success and profitability of its business also depend on its social and environmental impact.

This is why it has chosen to become a Benefit Company (SB) from the end of 2020.

This new type of company, introduced in Italy since 2016 with a special law, integrates in its corporate purpose, in addition to profit objectives, the purpose of having a positive impact on society and the environment.

To date, together with Extravega, more than 800 Italian companies have already chosen this business model, integrating in their Articles of Association the new purpose of common benefit.

1. GROUP ACTIVITIES

Extravega realizes tailor-made projects, characterized by high technical and production-construction complexity, with maximum precision and care for details.

Flexibility is a company highlight that allows to carry out any type of processing, not only on metal, but also on all other materials such as wood, glass, composite materials and liquid metal finishes.

The projects carried out range from architectural production for buildings and residences to exhibition stands, offices and showrooms and the most luxurious brand stores. For each project, total adherence to timelines and budgets is guaranteed, as well as care for the client's specific needs.

"It is hard to see where the work of someone ends, but most of all is hard to see where the work ends and the passion and the game begin."

Antonio Rillosi

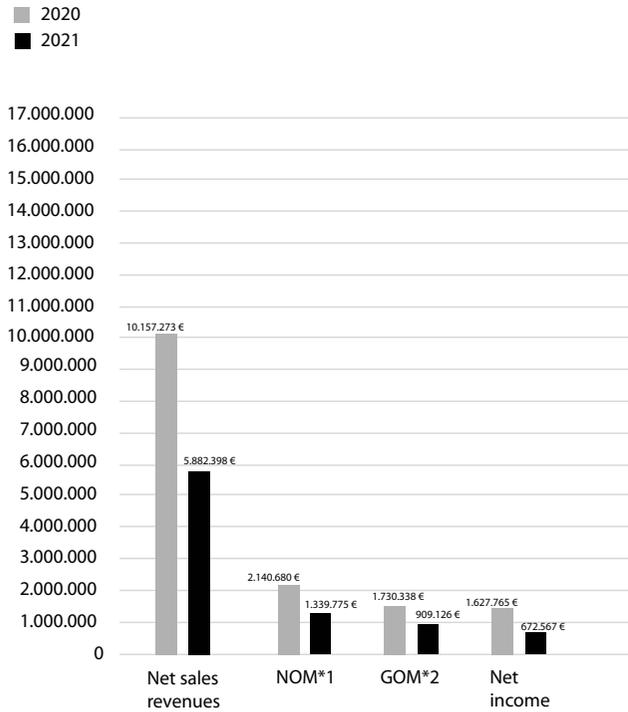

The organisational structure of the company consists of several Divisions:

1. GROUP ACTIVITIES

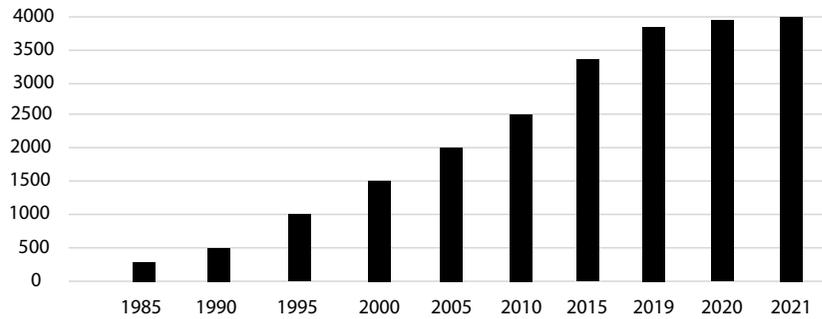

From the point of view of business areas, the projects carried out are mainly addressed to the architecture, interior design and art sectors. Our works, which have grown to over 4000 in the last 5 years, are directed for about 50% to the U.S. market, followed by Europe, the

Middle East and Asia/Australia. From the point of view of corporate governance, the level of supervision is the responsibility of the managers (it includes a steering committee which is composed of a group of 5 managers, two men and three women). There is a formal organizational chart that determines the management structure of the organization, and management team meetings are conducted to plan strategy and make decisions.

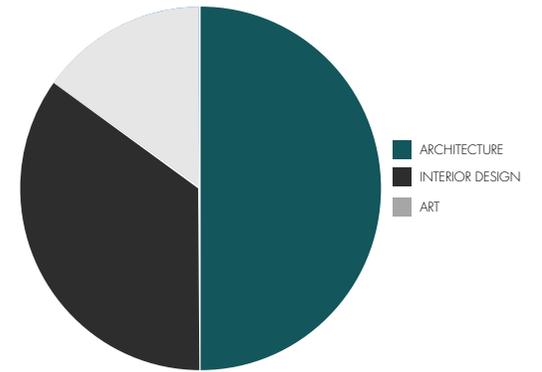

*1 - Net operating margin
*2 - Gross operating margin

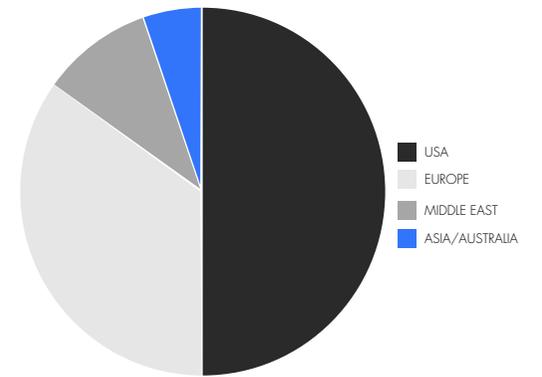

Economic results of the activities

Our works

Our sectors

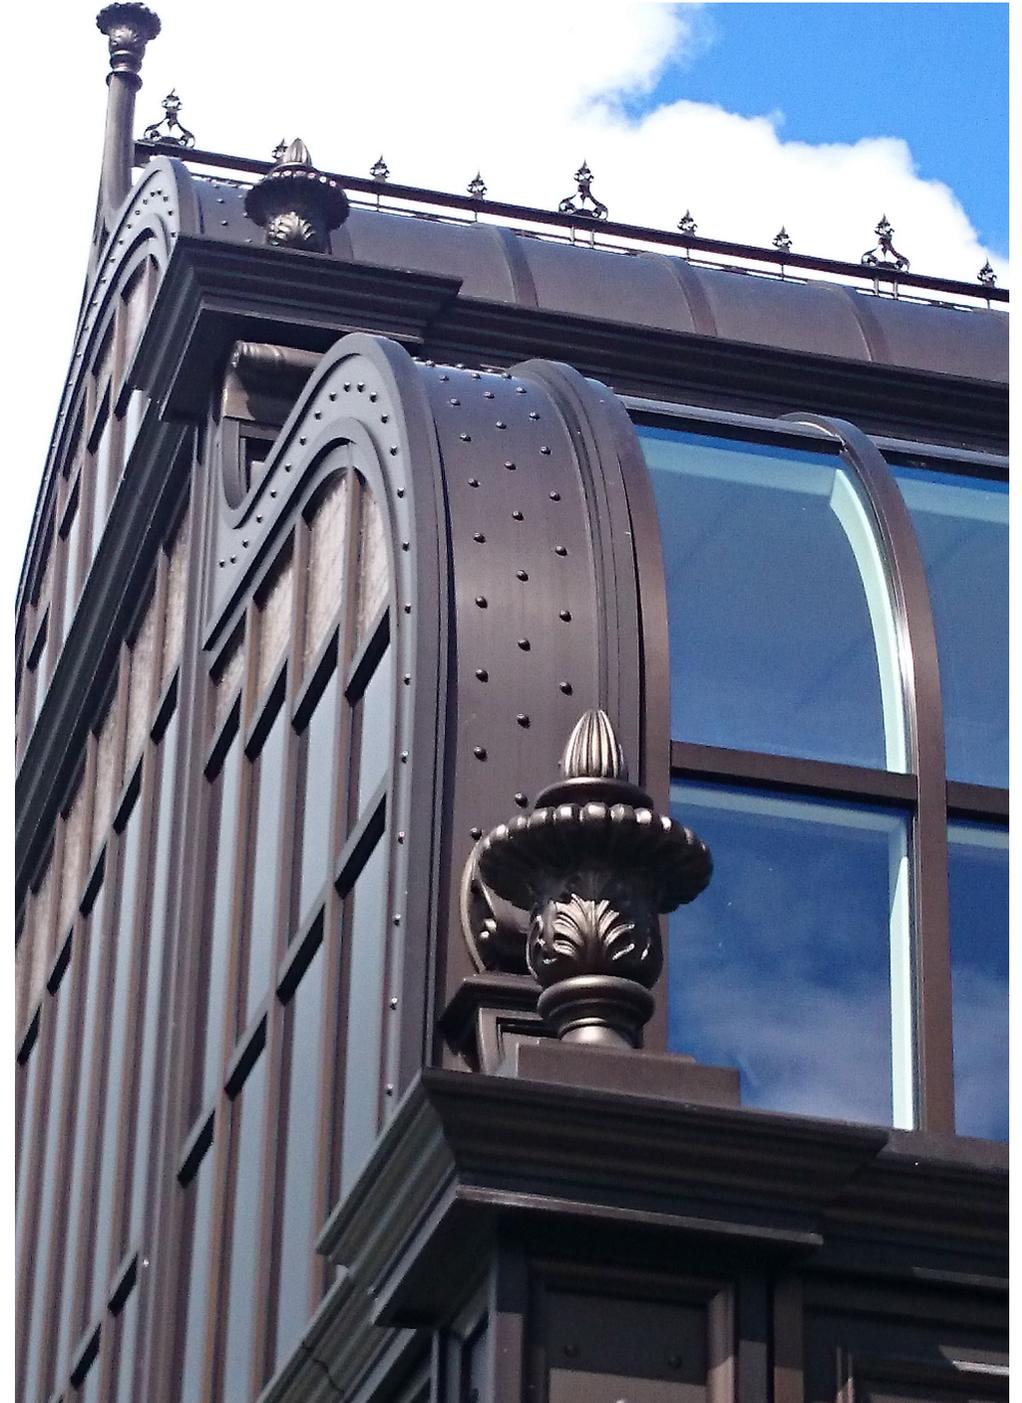

Where we operate

1. SUPPLY CHAIN MANAGEMENT

The company's supply chain consists of raw material suppliers, product manufacturers, professional service companies (consulting, legal, accounting) and independent freelancers.

Currently, we review and set requirements for the labor practices of our product and service suppliers considering the following aspects: compliance with all local laws and regulations; respect for human rights and international labor standards (for workers and contractors). More than 50% of major suppliers (on a monetary basis) undergo regular quality checks or audits.

As part of a process of continuous improvement and moving towards B Corp sustainability certification, Extravega intends to adopt criteria to assess the social and environmental profile of its suppliers.

1. EXTRAVEGA'S STAKEHOLDERS

The Stakeholders of our company are represented by all the organizations and people who are influenced by our activities and who are in turn able to influence them.

Extravega carries out more than 100 different projects per year, coming directly into contact with just as many customers, and indirectly with a large number of users of the products manufactured.

At the same time, our employees and their families are an essential interlocutor, as they are the suppliers of raw materials and services and, last but not least, the local community where we operate and the institutional bodies that govern it.

The categories of Stakeholders relevant to Extravega:

- Employees
- Customers
- Suppliers
- Local Communities
- Public Administration
- Third sector organizations

1. TOWARDS B CORP CERTIFICATION

B Corporation (also B Lab or B corp) certification of “social and environmental performance” is a private certification of for-profit companies. The B Corp certification can be obtained by companies after an external audit on the achievement of a score equal to or greater than 80 points, related to multiple aspects of corporate sustainability: Governance, Workers, Community, Environment, Customers. The verification involves the analysis of evidence following a B Impact Assessment (BIA).

Extravega is committed to achieving certification, with the aim of obtaining it by 2022. The BIA carried out has exceeded the threshold score of 80 and will be audited by B Lab Europe in the coming months.

1. THE IMPACT OF THE COVID-19 PANDEMIC ON OUR ACTIVITIES

Since the beginning of 2020, the pandemic has slowed down many of the relationships and projects the company was involved in. From an economic standpoint, Covid-19 has led to a nearly 40% reduction in revenue, with possible serious retaliation during the current year as well.

On the other hand, the company has reacted by putting people on a secure basis, creating a severance fund large enough to guarantee the possibility of paying severance advances to anyone who needs them. In addition, we have requested and obtained two large loans, of 1 and 2.5 million euros, the first with 12 months and the second with 24 months of pre-amortization, to ensure that we can proceed with all the development plans already evaluated at the beginning of the pandemic.

FOR EMPLOYEES

2. OUR PEOPLE

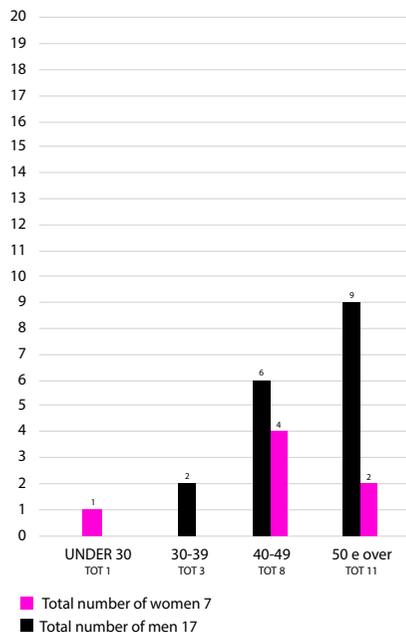

The people of Extravega are fundamental: the fellowship and mutual affection, the ethics of doing things to the best of their ability, and the philosophy of falling in love with projects are the main concepts on which the company has adopted to progress.

Extravega is a place where you don't go to work, but to do things well, with passion and desire. For the type of activity we carry out, flexibility is important, not having fixed working hours, allows employees to focus on the greater common good, which also aligns with both their own good, as well as their family's, the good of suppliers who help the company to improve, and finally, for the good of customers who receive excellent products. The following is a summary of the structure of our company from the point of view of people.

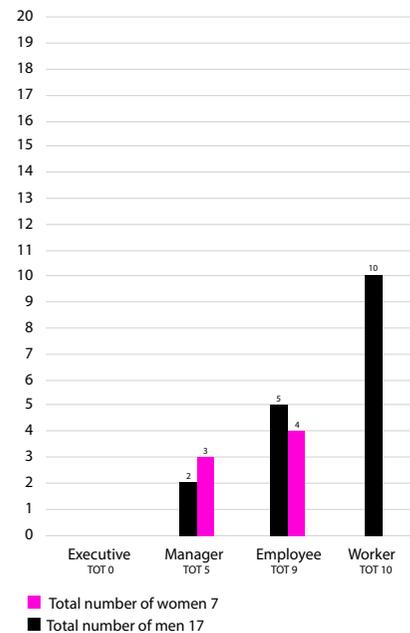

2020

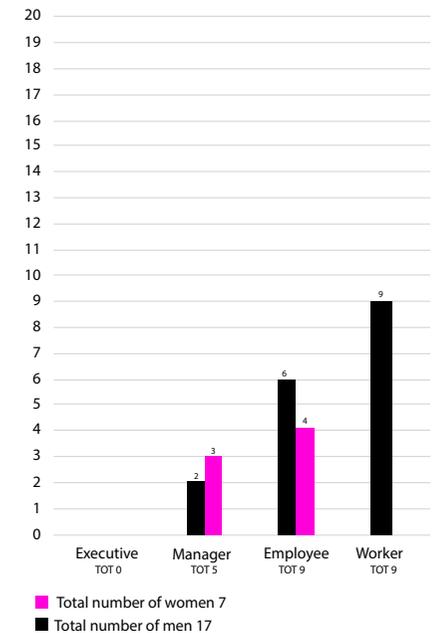

2021

2020

2021

Employees by age groups

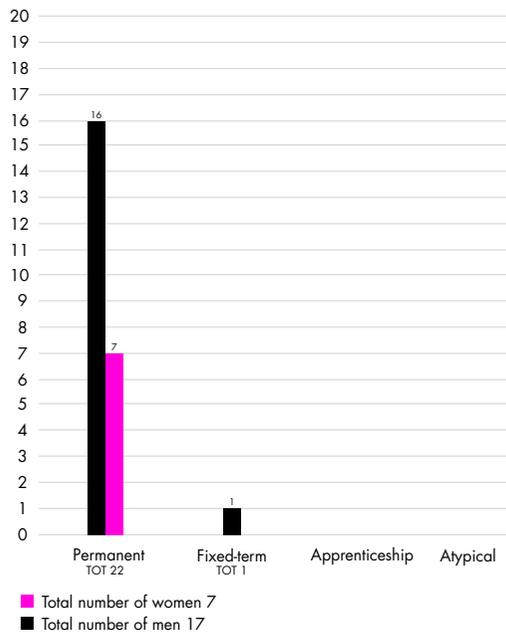

Employees by category

2. OUR PEOPLE

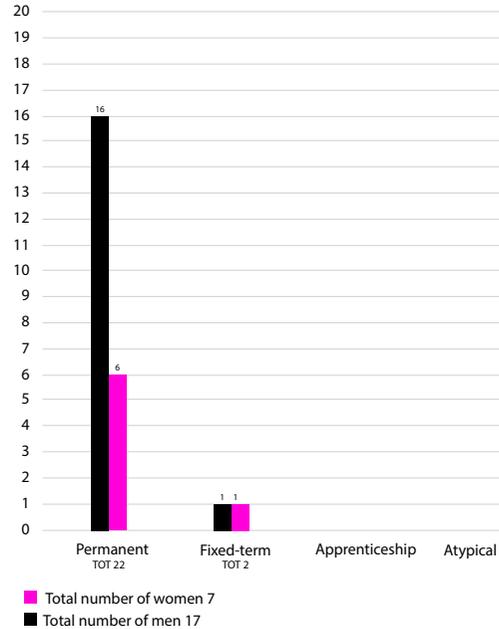

As the data shows, in the last two years, the number of employees has remained quite unchanged. From a gender perspective, the female component represents over 32% of the staff, increasing between 2020 and

2021, but also represents 60% of the managerial class. On the age distribution front, Extravega's people are divided in half between employees over 50 and people between 30 and 50 years old. In terms of contractual positions, blue collar workers prevail (42%) followed by white collar workers (39%) and middle management (21%), with almost all contracts being full-time (96%) and permanent (92%).

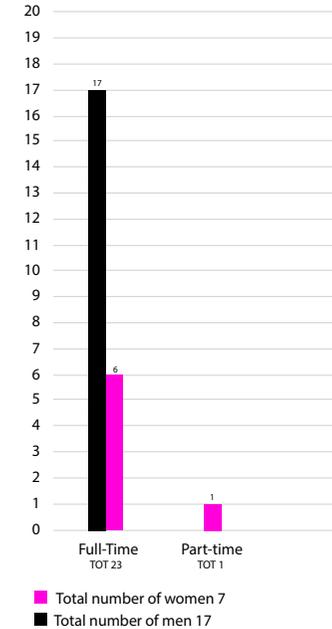

2020

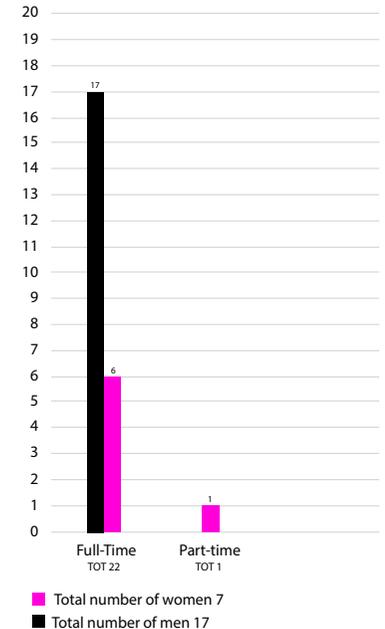

2021

Employees by type of contract

Employees by type of contract

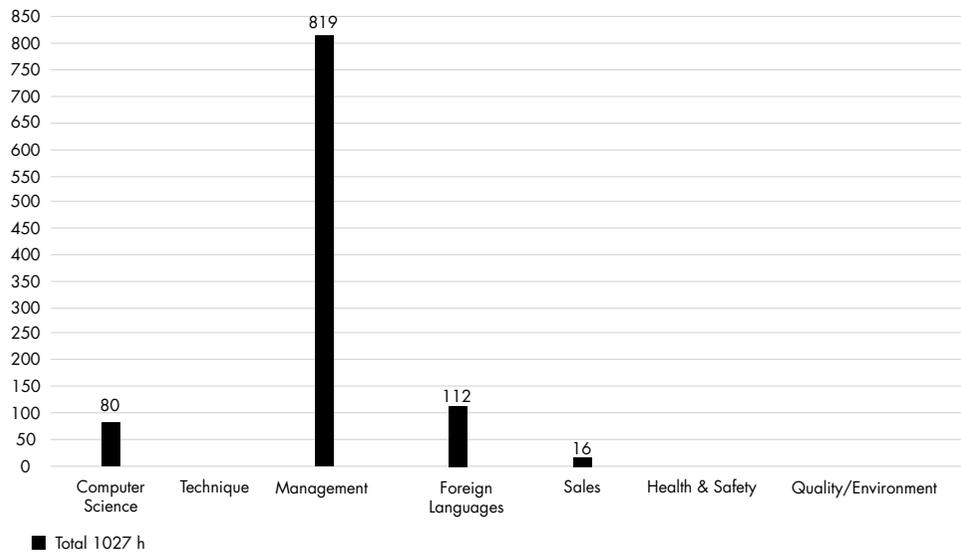

2. TRAINING AND SKILLS DEVELOPMENT

Extravega has always promoted and provided the possibility of continuous in-house training. The improvement of oneself and one's own abilities has a great impact on working productivity and allows the company to offer a better service by having an professional and up-to-date staff. Training is done on both hard skills and soft skills.

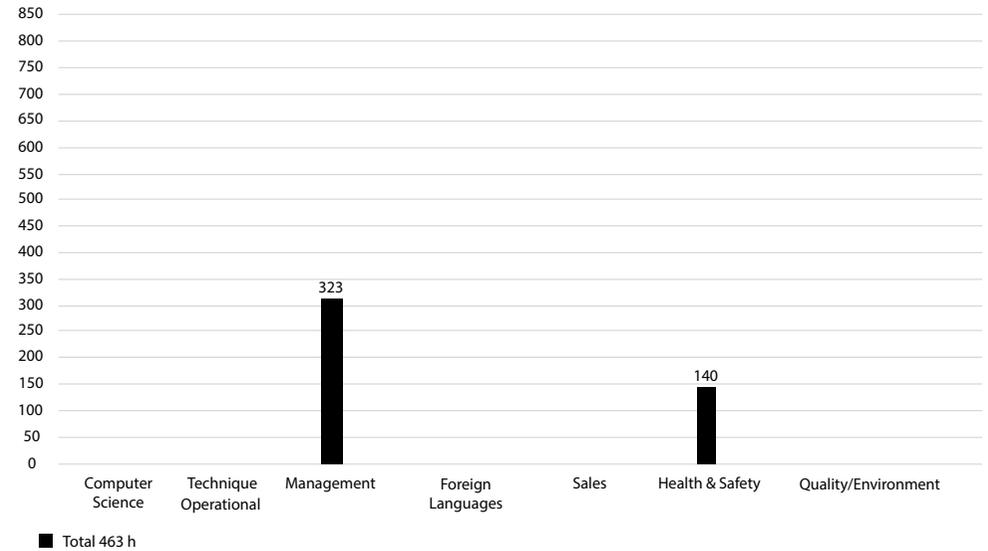

Our training is conducted annually and regularly with

various organizations including: Hubbard Management College, Assolombarda, Inventrix, Il Metodo. Below is a summary of the training hours provided in the last two years. As it can be seen, training activity decreased by 45% due to the slowdown in our sector after the year of Covid we had to focus on work operations. Always due to Covid, the choice has been made to suspend training related to Health, Safety. Overall, around 20.1 hours of training per capita will be provided in 2021. Training is provided and offered to everyone in the company: workers as well as managers, employees as well as salespeople.

2020

2021

Training per topic

2. COMMITMENT TO PEOPLE'S WELL-BEING

The Company must provide a work environment that protects the health and safety of its employees. To this end, Extravega puts in place written procedures and policies to minimize accidents and injuries to workers in the workplace, and updates a record of data on injuries, accidents, days lost or absences that is available to all workers.

On the employee well-being front, the company adopts various voluntary solutions to improve the quality of life of workers and their families, motivation and work climate in the company. These include:

- Advance payment of the Severance Pay (TFR).
- Monthly bonus awarded to the technical and production departments employees (Employees of the Month)
- Distribution of meal vouchers
- Corporate gifts at Christmas and Easter, trying to develop the theme of gratitude and give-back for those less fortunate than ourselves
- Corporate events, also open to customers and external collaborators
- Support of a Good Ideas Box
- Personalized water bottle with water dispenser
- Free coffee for all employees
- Introduction of 42 plants that purify the air
- Comprehensive health check-up programs
- Introduction of 2 company hybrid car in addition to the 5 present company hybrid cars
- Indoor air sanitation system

From a people involvement perspective, communication between management and workers is constant.

All employees complete a daily report before leaving the workplace, which the program automatically forwards to their supervisors. In this way, feedback is continuous and timely.

2. SUPPORTING PEOPLE DURING THE COVID-19 PANDEMIC

During the second year of the pandemic, Extravega continue to use the permanent sanitized air system within its work environment.

The aim is to maintain a healthy environment for its collaborators and the people who come to visit the Company.

EXTRAVEGA
FOR CLIENTS

3. OUR CLIENTS

From our headquarters in Paderno Dugnano, Milan, we create unique pieces designed by famous architects and designers: staircases, special windows and doors, facades, furniture and sculptures. Products made from natural materials such as metals, glass, wood, marble and composite materials, which enter wonderful apartments, luxury stores and prestigious hotels in the world.

Our products are assimilated to objects of art, in addition to architectural works, whether museums,

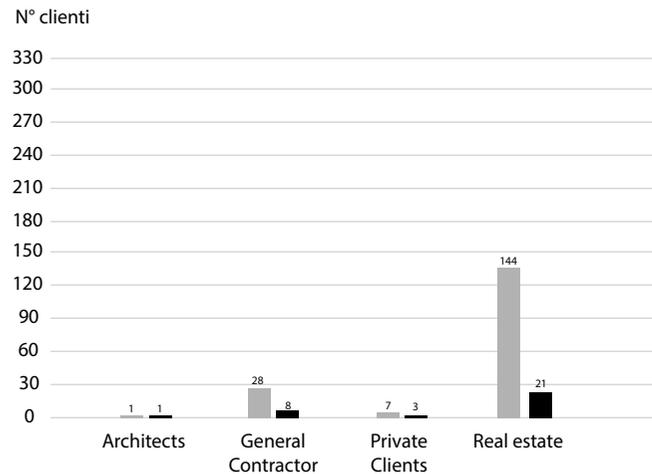

libraries, or private environments, where the beauty is perceptible and enchants the visitor.

This work is carried out by combining craftsmanship, organization, experience, engineering, avant-garde design and technological innovation.

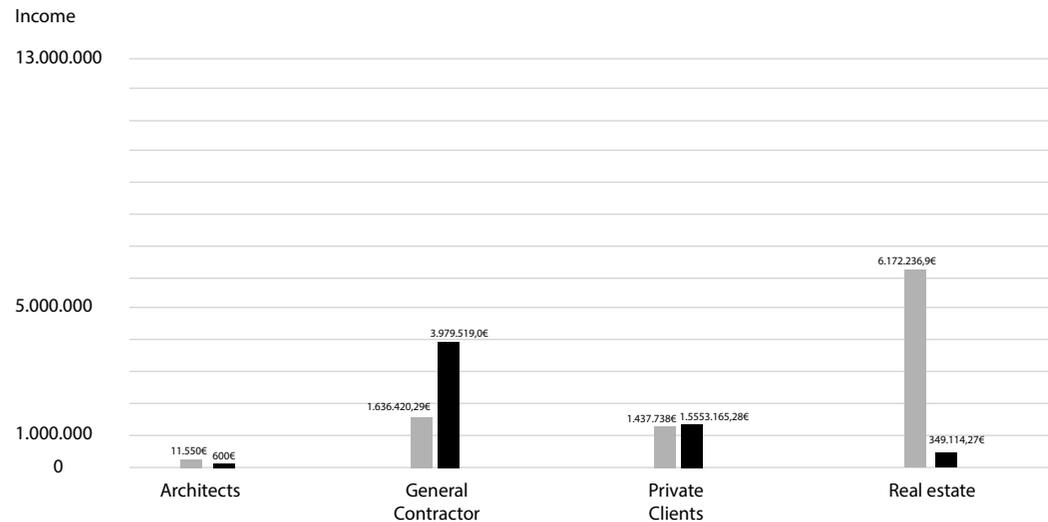

Extravega, thanks to its production departments equipped with cutting-edge machinery, is able to carry out the most diverse processes to satisfy every unique desire of the customer.

An internal technical department, made up of designers and architects, equipped with modern three-dimensional CAD-CAM systems, is responsible for the analysis of offers, research of materials, planning, development of executives, engineering, inspections on site, project control, and ensuring the accuracy of the final result in accordance with the needs of the customer. The watchword in Extravega is AUTONOMY: everyone grows constantly raising the bar of personal performance and acquired skills.

■ 2020 180 total clients
 ■ 2021 61 total clients

 ■ 2021 5.882.398,55€ total Income

Clients by typology

3. QUALITY OF SERVICES

Guaranteeing high quality standards in project, production and installation management systems is a constant and fundamental “must” for the growth of Extravega and its continuous path towards excellence. A voluntary choice made to obtain a quality certification, a gesture of further professionalism and added value for all its customers.

To this end, since 2018, Extravega has had a certified Quality Management System, with validity for the following products/services: Executive design, production and installation of architectural works, interior design, fittings of common spaces.

The Customer Satisfaction survey work continues constantly. The reference letters published on our website in the Portfolio> References section are increasing. We are waiting to receive more by 2022.

3. CUSTOMER RELATIONS

Even before becoming a customer, our communication is careful and ready to inform the prospect, in a transparent and clear way, about our way of working, our skills, the awards already obtained, and the testimonials from other customers.

After the acquisition of the interested contact by the marketing division, the sales division evaluates the opportunity to work concretely on new projects. From the moment of the quotation request until the development of the job order in production and completion of the work on site, the customer has only one figure as a direct contact, that is a dedicated Project Manager assigned to him by the Head of the Technical Department.

Moreover, the maximum assistance is guaranteed in case of need, even after installation. The same Project Manager follows the customer for all needs: from the signing of the contract, until after the conclusion of the work in a workmanlike manner. The relationship with the customer is always handled by the same person.

Misunderstandings are avoided and zeroed.

EXTRAVEGA
FOR COMMUNITY

4. OUR COMMITMENT TO THE COMMUNITY

Extravega places great value on strengthening relations with the local communities in which it operates and on collaborating with national and international organisations to help improve the quality of life of fragile or disadvantaged populations.

To this end, our company is committed to making economic contributions aimed at supporting associations and other voluntary organizations in various areas considered significant, such as the fight against poverty, hunger and water shortages.

At the same time, Extravega acts on its local community of reference, with projects that have an impact on the Paderno Dugnano area.

The main supporting project collaborations are described below.

4. DESIGN FOR FREEDOM

Extravega since 2018 has been supporting the U.S. nonprofit organization Design for Freedom, a movement created to raise awareness about forced labor in the construction supply chain, which aims to develop an industry-wide call to action. Design for Freedom's work is an interdisciplinary humanitarian mission to pursue peace through five initiatives - nature, art, justice, community and faith - specifically, Extravega helped the realization of such initiatives, by contributing to the construction of Connecticut's "Grace Farms" in 2015.

10.000€ expected
in 2022

4. DISTANCE ADOPTIONS

Inspired by the educational thought of San Giovanni Bosco, the Opera Don Bosco Foundation was created to support socio-educational projects and to help populations affected by natural disasters and humanitarian emergencies.

Since 1990, the Salesian Don Arturo Lorini has collected funds from about 15,000 benefactors to directly meet any requests for aid (might that be for maintenance, education, schooling, and/or medical assistance) of children in Ethiopia, Ecuador, Brazil, Congo and South Sudan.

Since 2000, Extravega has been contributing with donations to support long distance adoptions which Missioni Don Bosco has been promoting for years.

4. CHARITY:WATER

Since 2019, Extravega has been supporting the activities of Charity:water, a non-profit organization that has the objective of developing projects to bring clean, safe and potable water to people in developing countries that still do not have access. Since 2006, it has implemented over 60,000 projects worldwide.

In July 2021 Extravega donated \$ 12,000 for a new well in a community in Uganda that will be completed and made available by 2022.

10.000 € → IN FAVOUR OF

→ 10.000€ expected in 2021

4. CHILDREN'S TUMOR FOUNDATION

Extravega has been contributing since 2019 to the activities of Children's Tumor Foundation (CTF), a foundation dedicated to improving the health and well-being of individuals and families affected by neurofibromatosis (NF).

CTF's work includes promoting research and medicine development through a series of strategic investments: strengthening patient support, increasing public awareness of NF, and establishing better practices and personalized care on a case-by-case basis, up to and including the development of drug treatments tailored to the individual child and/or adolescent. In fact, thanks to the help of donors, CTF is taking the place of large pharmaceutical companies that aren't interested in treating one-of-a-kind cases.

5.000 € → IN FAVOUR OF

4. SUPPORT PROJECTS FOR THE CITY OF PADERNO DUGNANO

We are convinced that the success of a company is closely linked to the quality of the territories where it operates and to the people who live there. For this reason we want to contribute to the local development of Paderno Dugnano, the place where Extravega is based. In this sense we have carried out various initiatives of common benefit, consistent with our business activities, including:

- Donation to the Municipality of Paderno Dugnano of the sculpture 'Polycentric pavilion' made by Extravega on the occasion of the XXI International Exhibition of the Milan Triennial. The sculpture will be immersed in a fountain in Piazza della Resistenza in Paderno Dugnano, next to the offices of the Municipality.

- In September 2021 Extravega honored together with the city of Paderno Dugnano and the Mayor Ezio Casati, the volunteers and operators of the Vaccinal center of Paderno Dugnano by sponsoring a show of dancing fountains.

56.000 € → IN FAVOUR OF PADERNO DUGNANO CITY

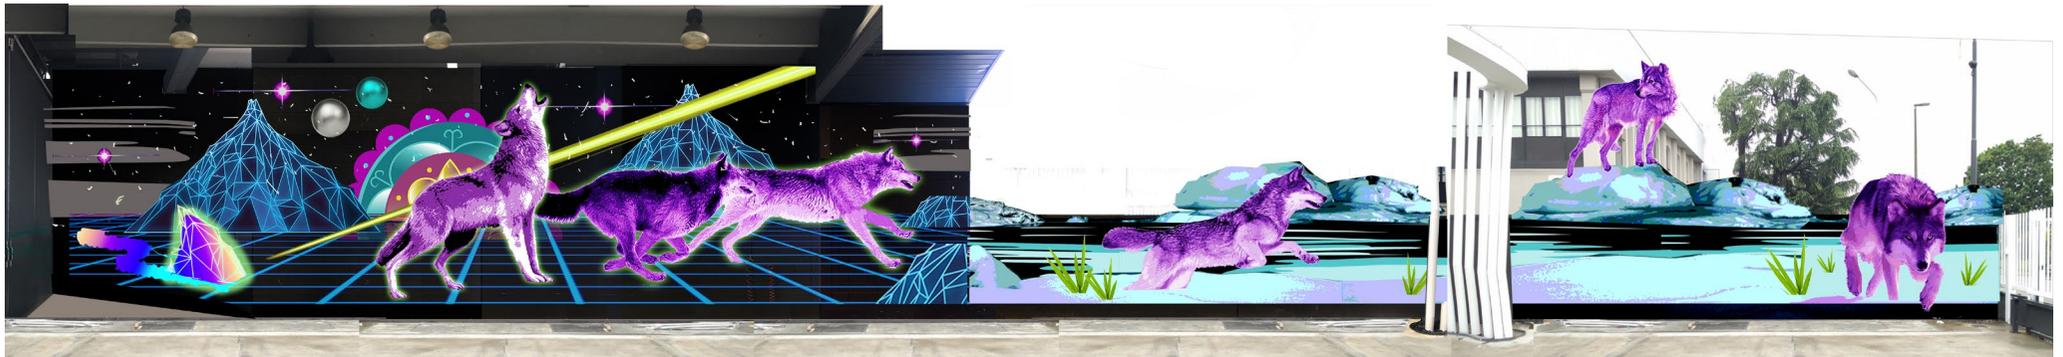

4. FEDERICO MASSA' MURALES

On the external boundary walls of Extravega's warehouse, we asked the internationally acclaimed muralist and set designer Federico Massa, AKA Lena Cruz, to create two murals that will be made by anti-smog paints with air purifying properties.

The project, in addition to adding a high aesthetic value, it improves the overall well-being of employees and the local community. The activity also aims to increase awareness of environmental and sustainability topics.

80.000 € —→ IN FAVOR OF COLLABORATORS / TERRITORY

4. ORANGE PHONE

We annually support the activities of *Telefono Arancione* (Orange phone), a national telephone service for talking to and helping entrepreneurs in difficulty, promoted by the Association *San Giuseppe Imprenditore*.

The project is run by entrepreneurs who have faced and overcome very serious crises. The team of select professionals have demonstrated great competence and benevolence while facing insurmountable obstacles.

4. ETHICAL ENTERPRISE

Extravega since 2017 supports the publication of the magazine *Impresa Etica* (Ethical Enterprise) and the organization of the Impresa Etica Award, both promoted by the Association *San Giuseppe Imprenditore*.

500 €
every year

IN FAVOUR OF

500 €

IN FAVOR OF

EXTRA VEGA

EXTRAVEGA
FOR ENVIRONMENT

5. EXTRAGREEN PROJECT: TOWARDS A SUSTAINABLE COMPANY

Our company bases its activities on the transformation of natural raw materials and semi-finished products, through a production process characterized by advanced technological tools.

In carrying out our activities, we take concrete conservation measures to minimize the consumption of water, energy, natural resources and other necessary raw materials, in order to reduce the amount of materials consumed, improve economic efficiency and increase their recycling and/or reuse.

We guarantee full compliance with current environmental regulations, which observe all the mandatory provisions in force. We have also internally shared a Code of Good Environmental Conduct, which represents our Corporate Environmental Policy.

This approach must also be reflected in our choices regarding logistics (packaging and transport methods) and the purchase of office materials as much as we can. In fact, water dispensers have been installed and flasks have been offered to employees to reduce plastic consumption, and in the break areas only ecologically-friendly reusables (glasses, napkins, cutlery) are purchased.

ExtraGreen is the company's attempt at reducing the negative environmental impact of all its activities. From the controlled procurement of consumables to reduce plastic consumption, and instead, increase the use of recycled materials, to the conscious separation of waste, available in each office and common areas, to the search for new collaborating companies that reflect our ethical and sustainable corporate policies.

5. USE OF MATERIALS AND MANAGEMENT OF WASTE PRODUCTION

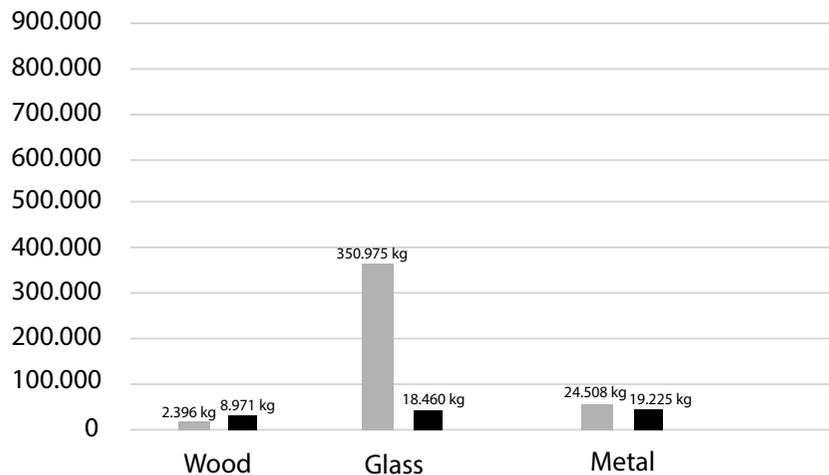

The materials we use are mainly metals, glass, and wood. These are recyclable materials made from raw materials that are not at risk of extinction. We do not use animal skins or other organic materials, but only synthetic products of the highest quality, both in terms of feel and durability. In terms of quantity, in 2021 we used over 8.9 tons of wood, 18,46 tons of glass and 19.2 tons of metals.

On the waste production side, the quality that characterizes our products is their potentially very long life cycle, which reduces their overall impact on the environment and avoids the need for disposal. At the production process level, the waste generated is mainly made up of wood, iron/steel and aluminium.

On the packaging side, at Extravega we use paper/cardboard boxes, wooden crates and stands, stretch film and bubble wrap.

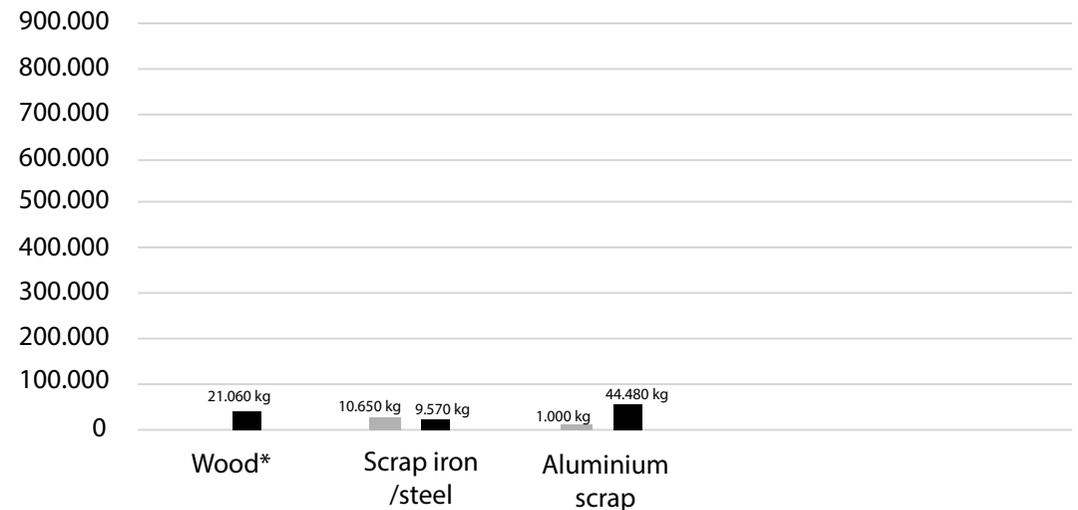

We are committed to finding sustainable packaging solutions, and are ready to experiment with the use of alternative materials

■ 2020 377.879 total kg
 ■ 2021 46.656 total kg

■ 2020 11.650 total kg
 ■ 2021 75.110 total kg

Waste produced

*Wastes from wood processing and the production of panels, furniture, pulp, paper and cardboard

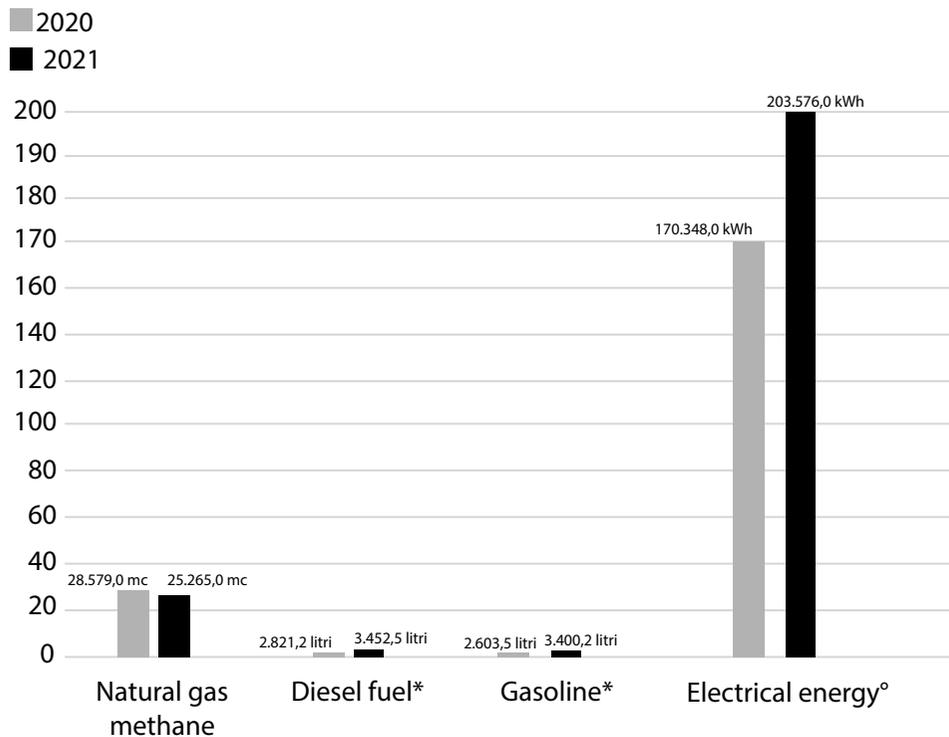

5. ENERGY CONSUMPTION AND INCREASED ENERGY EFFICIENCY

The energy consumption generated by Extravega occurs both directly, through the use of fuels for heating and fleet movement, and indirectly, through electricity consumption and logistics transport.

In summary, in 2021 there were about 1855 GJ used, mainly attributable to the consumption of natural gas (48%) and electricity drawn from the grid (39%). The remaining 13% is absorbed by the vehicle fleet.

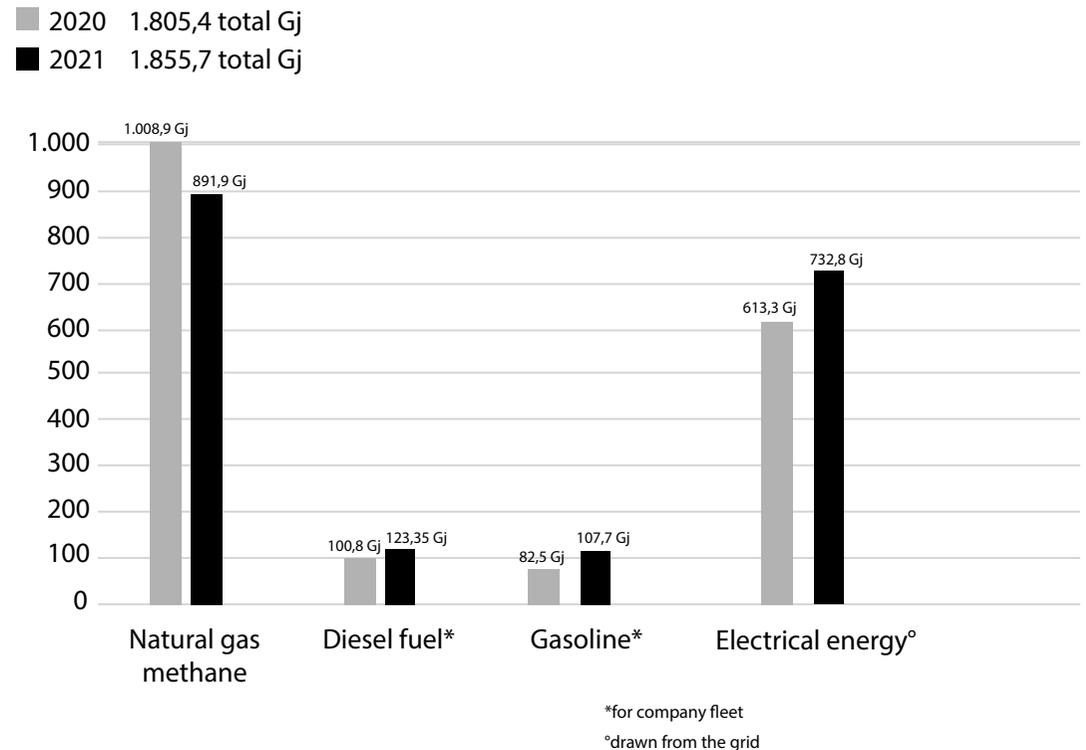

Energy consumption is the main source of climate-altering emissions: for this reason we are constantly striving to improve energy efficiency in the company. We have introduced laser processing with a fiber optic source that consumes a fraction of those operating with CO₂: this innovation has allowed us to reduce the power required from 200 kW in the past to less than 120 kW today.

In 2022 we will complete the installation of a 100 kW photovoltaic system. In addition, 100% of the electricity purchased by Extravega is produced from renewable sources. This is certified by specific Guarantees of Origin (GO), which guarantee that an amount of energy equal to that consumed has been produced by plants powered by a well-defined renewable source in a given period of time.

5. EMISSIONS CLIMALTERANTS

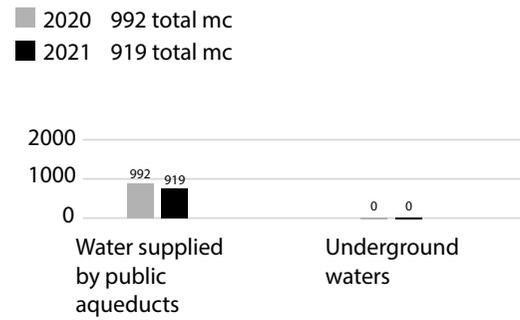

The emissions of CO₂ and other climate-altering gases produced by Extravega are mainly attributable to the consumption of natural gas and electricity.

In order to limit the production of climate-altering emissions, the company has launched various activities to reduce energy consumption, as described in the previous paragraph. In addition, since last year, 1 hybrid car has been introduced out of the 5 already present in the vehicle fleet, out of a total fleet of 10 cars.

5. WATER CONSUMPTION

The use of water by Extravega is mainly attributable to the production phase and civil consumption within the plants.

Since 2020, as a result of the Covid-19 emergency, consumption had significantly reduced by -61%, reaching 992 cubic meters. In 2021, consumption fell further to 919 cubic meters.

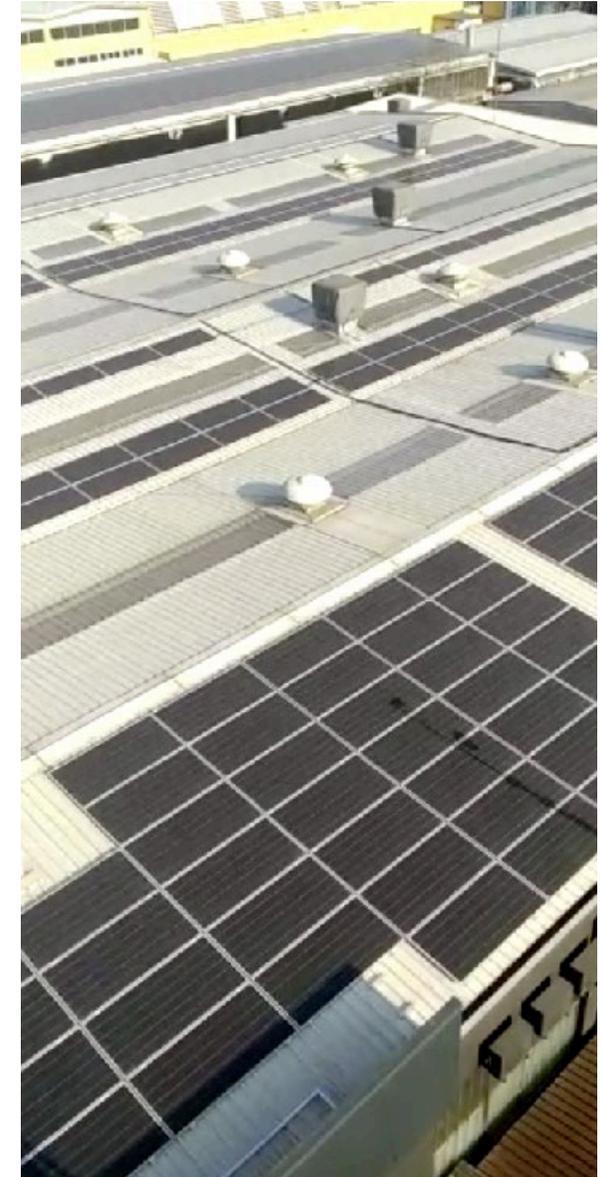

Water consumption

5. NEW PHOTOVOLTAIC SYSTEM

In June 2021 we introduced a new photovoltaic system in Extravega which will guarantee the abatement of over 1.2 million tons of CO2 in 20 years. By generating clean energy and replacing fossil fuels on the power grid.

The plant was installed last fall and is expected to be completed in early 2022.

The plant will ensure improved conditions and the elimination of reactive energy costs for an increasingly sustainable energy future.

EXTRAVEGA FOR THE SUSTAINABLE DEVELOPMENT GOALS (SDGS) OF THE UN 2030 AGENDA

<p>1 SCONFIGGERE LA POVERTÀ</p> 	<ul style="list-style-type: none"> • Creation of a severance indemnity fund for the payment of advances to employees during the Covid-19 emergency • Support for the Adoptions project of the <i>Opera Don Bosco</i> Foundation for educational and humanitarian projects in Africa and South America
<p>3 SALUTE E BENESSERE</p> 	<ul style="list-style-type: none"> • Comprehensive employee health check-up programs • Support to the Children's Tumor Foundation for projects related to the well-being of individuals and families affected by neurofibromatosis (NF)
<p>4 ISTRUZIONE DI QUALITÀ</p> 	<ul style="list-style-type: none"> • 20 hours of training per capita targeted at workers in 2021
<p>6 ACQUA PULITA E SERVIZI IGIENICO-SANITARI</p> 	<ul style="list-style-type: none"> • Support towards the programs of the non-profit charity:water for the realization of water-related projects in developing countries • Reduction of 7,4% in water consumption compared to 2020
<p>7 ENERGIA PULITA E ACCESSIBILE</p> 	<ul style="list-style-type: none"> • 100% of purchased energy is produced from renewable energy sources • Maintenance of laser processing with fiber optic source, which is significantly more efficient than those operating with CO2

EXTRAVEGA 2021 NEW SUSTAINABILITY TARGETS

Scope Sustainability	Object	Action	Timing	SDG
Governance	Certify corporate sustainability performance based on an international standard	Complete of the B Impact Assessment and achievement of B Corp sustainability certification	2022	12
	Report on sustainability commitments and results through a dedicated document	Create of a Sustainability Report 2022 with reference to GRI Performance Standards	2023	12
	Map and involve Stakeholders on Sustainability issues in a structured way	Implement of a Stakeholder Engagement process to support the realization of a Materiality Analysis	2022	12
Workers	Update and align internal knowledge and skills on sustainability issues	Realize of a training module on the main tools of Sustainability Management addressed to all managers and workers	2022	8
	Reporting on sustainability commitments and results through a dedicated document	Creation of a Sustainability Report 2022 with reference to GRI Performance Standards	2022	8
Community	Engage a sample of suppliers to assess their sustainability profile	Data collection survey to a sample of suppliers on environmental, social and governance aspects	2022	12
	Realize a project of intervention of building requalification with criteria of environmental sustainability and social inclusion	Preliminary design of the new Extravega/TIS headquarters project	2022	11
Environment	Achieve Carbon Neutrality for direct and indirect energy-related climate emissions	Realize of a Scope 1 and Scope 2 Carbon Footprint calculation and purchase of a corresponding amount of Carbon Credits	2030	13
	Carry out a company performance analysis on the main relevant environmental aspects	Define a set of specific KPIs for collecting qualitative and quantitative information and setting improvement targets	2022	12
Clients	Involve a sample of customers to analyze the perception of Extravega's sustainability profile	Survey questionnaire to collect information from a sample of customers on aspects of sustainability	2022	12

METHODOLOGICAL NOTE

This Impact Report represents the annual impact report required under Law No. 208 of December 28, 2015 (paragraphs 376-383 and attachments 4-5), which defines the reporting requirements for Benefit Societies.

With this in mind, the Extravega report contains:

- a description of the specific objectives, methods and actions implemented by the directors in pursuit of the purposes of common benefit and any circumstances that have prevented or slowed this;
- an assessment of the impact generated using the external assessment standard (GRI Standards) with characteristics described in Appendix 4 of the law and including the assessment areas identified in Appendix 5 (corporate governance, workers, other stakeholders, environment);
- a section dedicated to describing the new objectives that the company intends to pursue in the following financial year.
